

Jonny Dyer
Co-Founder & CEO
Muon Space

Jonny Dyer is Co-Founder & CEO of Muon Space, with a remarkable career spanning aerospace, geospatial technology, and complex systems engineering across industry-shaping companies. As Chief Engineer at Skybox Imaging, he led development of the largest high-resolution satellite constellation ever deployed before the company's \$500M acquisition by Google in 2014. At Google, he headed Maps' data collection team developing Street View cars and aircraft platforms, then served as Senior Director at Lyft's Level 5 Autonomous Vehicle group leading vehicle platform design and deployment.

Currently an Operating Partner at Space Capital and advisor to Ubiquity.vc, Jonny also serves as a founding member of EDF's MethaneSat Technical Advisory Group. He holds MS and BS degrees in Mechanical Engineering from Stanford University and has authored widely-cited research spanning thermodynamics, radiation effects, and imaging systems.
